5 User Mistakes That Undermine Your Alarm System

You've invested in a security system to protect what matters most - your home, your business, your peace of mind. But even the best system can fall short if it's misused. Many common mistakes don't involve faulty technology, but human error.

Forgetting to arm

No armed alarm, means no deterrence.

Sharing PIN Codes Insecurely

One universal code is a big vulnerability.

Over-reliance on CCTV

Cameras alone can't stop a break-in.

Poor maintenance

Dirty sensors often fail to trigger.

Ignoring false alarms

Non-emergencies breed user apathy.
